In their study on page 1472, Stephania Macchiarulo and Bernice Morrow showed in situ hybridization using a Jag1 antisense mRNA probe, and demonstrated that Jag1 expression was significantly reduced in the posterior, and to a lesser extent, anterior domains of the otic vesicle at E10.5 in Tbx1Cre\textsuperscript{\textast}\textsuperscript{\textplus}\textsuperscript{\textplus};Jag1\textsuperscript{\textast}\textsuperscript{\textast}\textsuperscript{\textast} mutant embryos as compared to Tbx1Cre\textsuperscript{\textast}\textsuperscript{\textast}\textsuperscript{\textast};Jag1\textsuperscript{\textast}\textsuperscript{\textast}\textsuperscript{\textplus} and Tbx1Cre\textsuperscript{\textast}\textsuperscript{\textast}\textsuperscript{\textast} embryos. Note that expression of Jag1 was also reduced in the pharyngeal apparatus but maintained in the forelimb, where Tbx1 is not expressed. Jag1 expression is also expanded throughout the OV in Tbx1Cre\textsuperscript{\textast}\textsuperscript{\textast}\textsuperscript{\textast} embryos. Raff, J. W.

**RESEARCH ARTICLES**

1404 Ubiquitination of basal VEGFR2 regulates signal transduction and endothelial function

1416 Blocking autophagy enhances the pro-apoptotic effect of bufalin on human gastric cancer cells through endoplasmic reticulum stress
Zhao, H., Li, Q., Pang, J., Jin, H., Li, H. and Yang, X.

1423 An immunofluorescence assay for extracellular matrix components highlights the role of epithelial cells in producing a stable, fibrillar extracellular matrix

1434 An AMPK-dependent regulatory pathway in tau-mediated toxicity
Galasso, A., Cameron, C. S., Frenguelli, B. G. and Moffat, K. G.

1445 HCN4 ion channel function is required for early events that regulate anatomical left-right patterning in a nodal and lefty asymmetric gene expression-independent manner

1458 SERCA directs cell migration and branching across species and germ layers

1472 Tbx1 and Jag1 act in concert to modulate the fate of neurosensory cells of the mouse otic vesicle
Macchiarulo, S. and Morrow, B. E.

1483 Molecular regulation of high muscle mass in developing Blonde d’Aquitaine cattle foetuses
Cassar-Malek, I., Boby, C., Picard, B., Reverter, A. and Hudson, N. J.

1493 How does oestradiol influence the AVT/IT system in female round gobies during different reproductive phases?
Kalamarz-Kubiak, H., Gozdowska, M., Guellard, T. and Kulczykowska, E.

1502 CLASP1 regulates endothelial cell branching morphology and directed migration
Myer, N. M. and Myers, K. A.

1516 Influence of a GSK3\beta phosphorylation site within the proximal C-terminus of Neurofilament-H on neurofilament dynamics
Vohnoutka, R. B., Boumil, E. F., Liu, Y., Uchida, A., Pant, H. C. and Shea, T. B.

1528 Vestigial-like 3 is a novel Ets1 interacting partner and regulates trigeminal nerve formation and cranial neural crest migration
Simon, E., Thézé, N., Fédou, S., Thiébaut, P. and Faucheux, C.

1541 Forces to pierce cuticle of tarsi and material properties determined by nanoindentation: The Achilles’ heel of bed bugs
Bustamante, J., Panzarino, J. F., Rupert, T. J. and Loudon, C.

1552 The terminal nerve plays a prominent role in GnRH-1 neuronal migration independent from proper olfactory and vomeronasal connections to the olfactory bulbs

1569 Grazing limits natural biological controls of woody encroachment in Inner Mongolia Steppe
Guo, H., Guan, L., Wang, Y., Xie, L., Prather, C. M., Liu, C. and Ma, C.

**METHODS & TECHNIQUES**

1575 Quantitative analysis of mechanical force required for cell extrusion in zebrafish embryonic epithelia
Yamada, S., Iino, T., Bessho, Y., Hosokawa, Y. and Matsui, T.
